

Count Control Table LT100

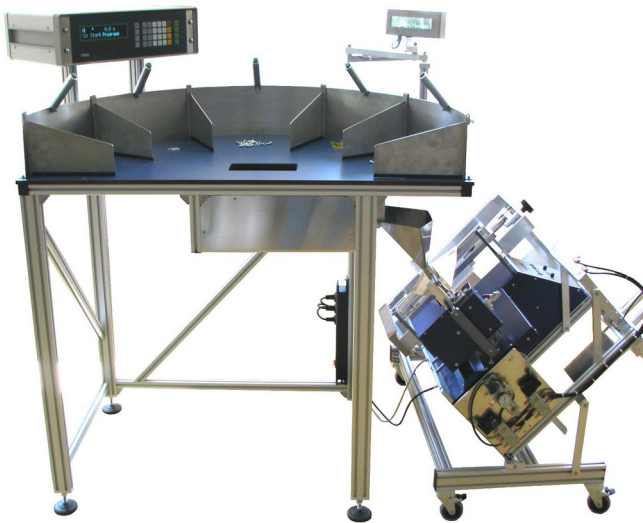

The Lauper LT100 count control table offers you a convenient solution for packing hand-sorted products and small parts. The number of small parts is counted by a comparative weight or acknowledged by manual operation. The following Lauper LVX packaging machine reliably packs the products in the bag.

Functionality and Design

The count control table LT100 will be customized according to your needs. There are almost no limits to the size (length and width). You can program up to 20 different components. The sequence and the quantity of the components per counting process is visualized to you by light signals and a remote digital display.

Options and Features

- Semi-automatic packaging of small parts
- Part feed by hand
- Sorting table with adjustable compartments
- Integrated weighing system
- Visualized active compartment
- Operator guidelines by clear text display
- Compact and stable design
- Single type or assortment bags
